DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. **Claims 31-84** are rejected under 35 U.S.C. 101 as claiming the same invention as that of **claims 1-42 and 44-55**, respectively, of prior U.S. Patent No. 6,792,364. This is a double patenting rejection.

Allowable Subject Matter

3. **Claims 1-30** are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: Hartman teaches a revenue meter. The prior art of record does not teach a detector coupled with the memory and operative to computer a plurality of rolling voltages from the stored digital samples over an interval and to compare each of the plurality of rolling voltages to a threshold and indicate a sag/swell event when rolling voltages deviates from the threshold.
